ThrallRadio Host Economy Whitepaper

ThrallRadio Host Economy Whitepaper ThrallRadio operates a distributed network of listening stations known as ThrallNumbersStations. Participants deploy SDR receivers connected to everyday computing devices to contribute local RF coverage. Rewards Model Hosts earn based on uptime, geographic importance, and signal discovery contributions. Token / Credit Model Credits may be issued for uptime hours, unique signal captures, and geographic coverage bonuses. Uptime Incentives Nodes maintaining high reliability receive higher reward tiers. Geographic Coverage Bonuses Regions with limited RF visibility receive additional incentives to encourage deployment. Economic Vision The host economy transforms thousands of small contributors into a global sensing infrastructure.
